## Open Native Graph DB (ONgDB)

### The free and open source Neo4j Enterprise project

Open Native Graph DB (ONgDB) is a non-restrictive fork of [Neo4j](#), the world’s leading Graph Database. It is a high performance graph store with all the features expected of a mature and robust database, like a friendly query language, ACID transactions and high availability clustering. The programmer works with a flexible network structure of nodes and relationships rather than static tables — yet enjoys all the benefits of enterprise-quality database. For many applications, ONgDB offers orders of magnitude performance benefits compared to relational DBs.

### Licensing

ONgDB distributions are licensed under AGPLv3 as a free and open drop-in replacements of Neo4j Enterprise commercial licensed distributions with the same version number.

### Latest Release

ONgDB **3.5.8** is expected to be out shortly. We skipped a few versions to allow Neo4j to fix some bugs in previous versions.
